Experience

UI/UX Designer @ Cosmic Design Agency, Florida

May 2023 – October 2023

- Designed the end-to-end UI for a new mobile banking app, focusing on simplicity, trust, and ease of navigation to support secure user transactions.
- Developed wireframes and high-fidelity prototypes for a workspace booking app, streamlining the booking flow and reducing friction in user journeys.
- Designed a mobile-first UI for a dating app with intuitive gestures and clear visual hierarchy, contributing to longer session durations and increased interaction rates.
- Designed a responsive website for a talent booking platform, enhancing visual storytelling and reducing bounce rates through improved layout and structure.
- Created concept-based UI designs for various product ideas, showcasing creative thinking, interaction design, and cross-platform adaptability.

UI/UX Designer @ Ayacorp, Mauritius

September 2023 – September 2025

- Redesigned Zunko, Mauritius' first stock trading app, simplifying complex trading flows and modernizing UI to improve usability and user confidence in financial transactions.
- Redesigned Otayo event booking app, optimizing discovery and checkout flows across multiple event categories to improve conversion rates.
- Designed Harmonix AI App from concept to prototype, streamlining voice selection and song conversion workflows, creating educational onboarding to reduce learning curve, and integrating leaderboard gamification to drive user engagement.
- Designed and developed Friday's website - a real estate investment company, creating a unified information system that consolidated 3 distinct sub-brands (development, agency, rental management) into one cohesive experience while maintaining clear service differentiation and user pathways.
